Camera Dimensions:

With 700 TV Line Resolution!

Mini Dome Camera:

The MD001IR camera from Dolphin Marine, incorporates the latest Sony Super HAD chip-set ensuring a superior picture quality. In addition to this it has a low level light sensor that will automatically switch from colour to monochrome. This is then further enhanced with Infrared LED illumination to maintain a perfect picture whatever the light conditions.

The compact and stylish vandal-proof housing measures just six centimeters in diameter and is certified waterproof with an IP66 rating.

Specification may change without prior notice

Versatile & Compact, the MD001IR Camera enhances visibility, while increasing safety on & off board - all around your vessel!
